Dear Scott McLain,

I would like to thank you for letting us distribute your Scratch Off Product. After many years of searching for a satisfactory product that was easy to use and had professional results, we were happy to find that your product exceeded our expectations. I highly recommend Scratch Off to anyone who is interested in removing minor scratches and scuffs from their Aircraft windshields and windows.

Scratch Off makes it easy for anyone who owns any kind of corded or cordless electric drill to get professional results quickly. Other similar kits we tried either required a special tool, such as a DA (dual action sander), or were too labor intensive and took too much time. With the utilization of your special foam pads and the four polishing compounds I believe you have an exceptional product.

Sincerely

John Zofko III
